

Website Developer Guidelines – JD Productions

1. Company Overview

JD Productions is a creative media production company specializing in cinematic video production for brands, businesses, entrepreneurs, and events. The studio creates high-quality visual media used for marketing, storytelling, brand identity, and digital promotion. Core services include brand storytelling films, event coverage, corporate interviews, promotional media, and cinematic social media content. The company exists to help organizations communicate their message with visual clarity and cinematic impact. The primary problem JD Productions solves is the gap between ordinary content and strategic visual storytelling that elevates brand credibility and audience engagement.

2. Brand Mission & Vision

Mission: To produce cinematic visual media that helps brands communicate clearly, elevate perception, and build long-term audience trust.

Vision: To become a premier creative studio recognized for visually compelling storytelling and strategic brand media.

The website should visually reflect cinematic authority, professional craftsmanship, and storytelling power. The experience should feel immersive, confident, and visually striking.

3. Brand Personality

Premium • Cinematic • Modern • Professional • Minimal • Bold • Creative • Story-Driven

4. Target Audience

The audience includes businesses, entrepreneurs, organizations, and brands that require professional visual media to promote their identity and products. They value professionalism, visual storytelling, and premium creative execution. The website must immediately communicate credibility, creative excellence, and production quality.

5. Color Palette

Primary: Black (#000000) – dominant background color creating cinematic tone

Secondary: White (#FFFFFF) – contrast for readability

Accent: Cinematic Gold (#C8A046) – highlight elements, subtle luxury accents

Background Variant: Charcoal (#111111) – section backgrounds

Text: Light Gray (#E5E5E5) – readable text on dark backgrounds

6. Typography System

Primary Headline Font: Playfair Display – cinematic, elegant headings

Secondary Headline Font: Poppins – modern structured headings

Body Font: Inter – highly readable body text

7. Logo Usage

Primary Logo – header navigation and hero introduction

Secondary Logo – footer and alternate placements

Icon Logo – favicon, social icons, small UI placements

8. Reference Website Inspiration

Design inspiration should be drawn from the desktop website experience of Lucasfilm (<https://www.lucasfilm.com>). The goal is to emulate the cinematic presentation style rather than replicate the site directly. The following elements should guide the design:

- Dark cinematic interface
- Large visual hero media
- Minimal text with strong visual storytelling
- Film studio aesthetic rather than traditional portfolio design
- Smooth transitions and immersive sections
- Elegant typography hierarchy
- Generous spacing and clean layout

9. Website Structure (One-Page Prototype)

The homepage should follow a cinematic scrolling experience with clearly defined sections:

Hero Section

11. Technical Requirements

- Fully responsive design for desktop, tablet, and mobile
- Optimized media loading and page speed
- Clear typography hierarchy
- Consistent spacing grid system
- Clean, maintainable HTML/CSS architecture
- Smooth scroll transitions and subtle motion elements

12. Goal of the Prototype

The prototype serves as the visual foundation for the JD Productions website. It demonstrates the brand identity, showcases cinematic work, and creates a strong digital presence for clients, collaborators, and investors.
